Small Dam Required?: No

=====

OTHER COMMENTS*****

=====

The flow rate of 5.5 cfs is considered to be an average flow based on measurements taken in 1955. The original diligence filing claims the right to use all waters from Fish Creek and Carcass Creek naturally occurring above the points of diversion during the irrigation season.

Water is diverted for storage into Fish Creek Lake under the following water rights:

95-513	143.5 ac-ft
95-237	53.0 ac-ft
95-402	156.6 ac-ft

TOTAL	353.1 ac-ft
-------	-------------

All stored water is used for irrigation, domestic, and stock use and is accounted for under those uses for each water right.
